loans by class

- Good = Fully Paid + Current;
- At Risk = Grace Period + Late;
- Bad = Charged Off + Default.

- Amount received includes recoveries.
- Received/funded is below 1.0 for classes that are still repaying.
- MoM for received is not like-for-like: recent loans have had little time to repay.

Trend Analysis

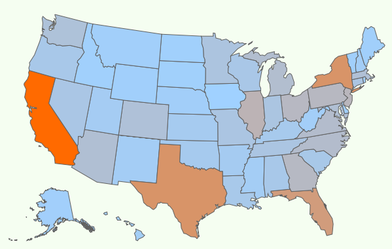

Selected Measure Over Time

Average Interest Rate by Month

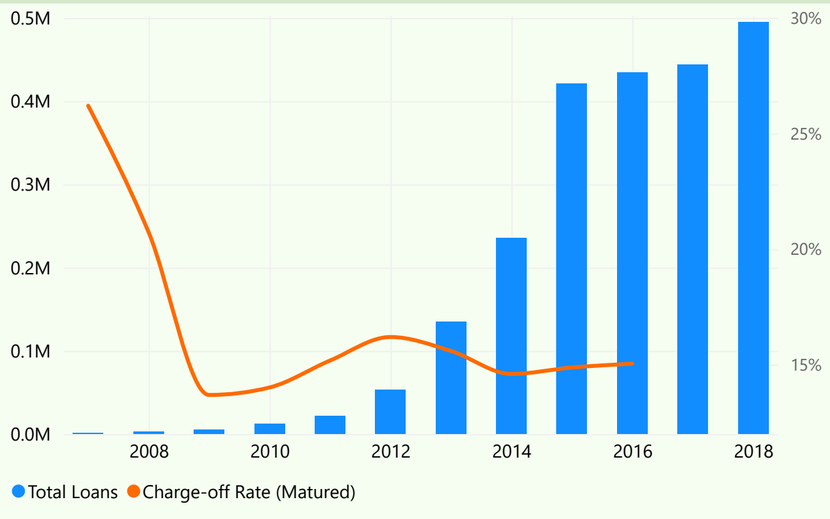

Selected Measure by State

- Amount received for recent months reflects little repayment time and is not like-for-like.
- Monthly issuance is lumpy in 2014-2015; use quarters or years to read trends.
- 2007 starts in June, so 2008 growth is inflated.

Approval Rate by Loan Amount Band

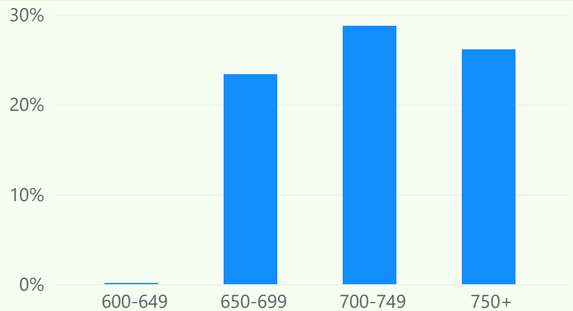

Approval Rate by State

Approval Rate by DTI Band

Approval Rate (2007-2014) by Credit Score Band

Approval rate = accepted / (accepted + rejected).

- Accepted loans are dated by issue month, applications by application month, so rates are approximate.
- Credit score is only reliable for 2007-2014 (blank in most rejected rows from 2015).
- Rejected employment length and DTI values are partly placeholders, so employment length is not used.
- Credit score is measured differently in the two files (fico_range_low vs risk score).
- State differences mix many factors and should be read cautiously.
